A ground-breaking new book

The Greening of Health, HealthCare, Health-Systems and Well-Being

Edited by Dr Katherine Kennet, a Medical Practitioner and Global Health Specialist, Miriam Kennet and Michelle Gale de Oliveira

Published by The Green Economics Institute

This unique book aims to demystify talk about health, healthcare and health systems and make it accessible and usable for everyone!

This book explains the main features of Healthcare, equality of access and the implications & also how it needs to change.

From, the contemporary perceptions of healthcare, from “Obamah Care” to the rate of maternal mortality in standard childbirth in Africa, this book looks at how the health of the world would improve with the implementation of some basic ideas. It explains the link between economic equality and good health.

ISBN: 978-1-907543-760

Approximately 300 pages are packed with health stories from around the world, from Egypt to Bhutan and South America how health is vital for everyone on the planet.

• The book explores the link between our place in nature and the environment and our health

• The book reminds us that its the basics of healthcare such as hygiene that matter and in parts of the world, hospitals may not always even have a bar of soap, let alone running water or electricity. The topical and vital link between economic equality and good health is strongly made in the book.

• The book provides contemporary and latest views on health, healthcare and well being and a discussion of the many and diverse ways of how its delivered in many parts of the world.

The Greening of Health and Well-Being

The failure of healthcare to invest in people is paid for by the public. For ordinary people, who often have no access to safe, affordable health care, in many countries, this is a situation which could easily be avoided. This book presents the facts for easy to implement changes and tells the many success stories from around the world where this is changing and gives cause for real hope in the implementation of the Millennium Development Goals.

Launching at our Oxford University Conference in July 9 10 11 2014

This book brings innovations in health and health care to a broader group of readers, students, policy makers, academics, campaigners and health professionals in this ground breaking volume.

Editor's Biographies

Dr Katherine Kennet is a practicing medical Doctor who trained at Imperial College, London and she is a Global Health Specialist who has most recently practiced Medicine in Nepal and the UK. She writes about maternal health and outcomes for women, children and poverty as well as women's access to health careers and to health care.

Miriam Kennet is Director and Co-founder of the Green Economics Institute. She is a member of the Environmental Change Institute, Oxford University. She is the editor and author of 100s of articles, book chapters and books in many languages. Miriam recently was named as one of the 100 most powerful women making change globally by a leading poverty charity in London. She is the founder and Director of The Green Economics Institute and the International Journal of Green Economics and was keynote speaker at the Northern Area of the National Health Service in November 2012 discussing Healthcare and Well Being and ran the world's first ever Green Economics and Health and Well Being Retreat.

Michelle S. Gale de Oliveira (USA and Brazil) a director of the Green Economics Institute, UK & a member of the Law School of the University of London School of Oriental and African Studies (SOAS), and a specialist in Human Rights Law, Peace-Building, and Developing Countries. Founder of the Gender Progress Consortium. Her writing has been featured in Europe's World, one of the foremost European policy magazines. She lectures and speaks regularly in Africa, Europe, and Latin America. She has led delegations to the Kyoto Climate Change Conference of Parties (COP15/16) in Copenhagen and Cancun and the RIO+20, United Nations Sustainable Development Conference, where she ran three popular side events on green economics.
