This dynamic region never ceases to fascinate and to surprise.

Latin America, a group of 25 countries, is home to 600 million people, 6% of the world's population. Brazil, its largest nation, is a “BRICS” nation and the sixth largest economy in the world. Sao Paolo city is the fifth biggest in the world. Latin America extends from Mexico’s northern border with the United States, the icy lands of Patagonia, to the tropical jungles of the Amazon and to the Caribbean.

It has a tremendous biodiversity and shifting and dynamic natural and geo-political climates, with some serious socio-economic challenges. With its rich cultural, political, and natural diversity, the many nations of Latin America provide a unique canvas for the study and application of Green Economics. The economic development, social contexts, and environmental conditions of each state and region are each unique and also highly complex.

This book shares with the Reader insights into the latest innovations, new practises and projects.

**Editor’s Biographies**

Michelle S. Gale de Oliveira is a Director of the Green Economics Institute, UK. She lives in Sao Paolo State in Brazil where is married to a Brazilian Dentist in the remote part of the country. She is a member of the Law School of the University of London School of Oriental and African Studies (SOAS), holding an MA in Human Rights Law with a focus on Islamic Law, Peace-Building, and Developing Countries. Founder of the Gender Progress Consortium, she holds degrees in Political Science and International Relations from Richmond, the American International University in London (RAIUL). Her writing has been featured in Europe's World, one of the foremost European policy magazines. She lectures and speaks on Human Rights, Environmental and Social Justice, Gender Equity, International Development and Green Economics internationally. Recently she ran a conference on women’s unequal pay and poverty in Reading, UK, lectured at the Oxford University Club on the human rights of land reform, lectured on green economics in Berlin, at retreats in Glastonbury, UK, and is a regular speaker at international conferences. She is a member of the Human Rights Lawyers Association, the Law Society of England and Wales Human Rights Lawyers Group, the London Middle East Institute. In 2010/2011, she was a delegate to Conference of Parties (COP15/16) in Copenhagen and Cancun, and in 2012 led our delegation to RIO+20, where she ran our three side events.

Professor Maria Alejandra Madi (Brazilian) is a specialist in Economics and the intersection between macroeconomics, finance and socio-economic development. Retired Professor at the State University of Campinas, Brazil, she is currently Director of the Ordem dos Economistas do Brasil and Counselor at the Conselho Regional de Economia–SP. She is co-author of chapters of books edited by the Global Labor University and the academic advisor to the Green Economics Institute.

Carlos Francisco Restituyo Vassallo (Dominican Republic) is an economist uses the opportunities for creating change there. Due to his background living in Santo Domingo he is very familiar with the ailments of developing nations. Currently researching at Richmond, the American International University in London, his academic interests include economics, philosophy and the environment. He brings a young academic’s perspective to the development issues of Latin American nations and has edited this current book. He inspires others to make change and is very keen to promote understanding of the situations both in the Dominican Republic and its less fortunate neighbour Haiti and to help them overcome their social, economic and environmental challenges.

**Book chapters authors from around Latin America and the Caribbean**
