

# The Green Economics Institute

*Climate Change COP Historic Agreement debrief from  
our team on the ground who helped facilitate it  
Wednesday 23<sup>rd</sup> December 2015 in Europe House  
London*

In association with, The Green Economics Institute Trust. The International Journal of Green Economics- the world's first Green Academic Journal, our delegation to COP 21 Paris Climate Conference.

## Introducing The COP Agreement-

**What does mean? What do we need to do now?**

**Get the Inside Story from those who were there!**

Transparency, legally binding, science to ensure we achieve it- operationalising the economy to support it .Come and hear from the cutting edge of how it all works and how you can get involved and help save the planet, the climate and the economy

**Briefing 5pm – 8pm All welcome. Book now [\\_greeneconomicsinstitute@yahoo.com](mailto:_greeneconomicsinstitute@yahoo.com)**

**(This event must be pre booked and a place reserved for you)**

Photos- Our CEO with Ban Ki Moons Climate Advisor, Photo South Africa's negotiators opening the Wednesday Plenary with a shock announcement- its 1.5 degrees or nothing a red line has been drawn by the negotiators! The moment it all started to come together

### History in the Making!

**Paris December 2015: Don't miss this Debrief about a very important turning point and a part of history.** Your grandchildren will want to know what you did for them during this important process.

There is much more to do.

The accord needs to be fine tuned in Morocco in December 2016 and we need you to help advocate for that

The conference was one of the most important watershed moments in human history and the opportunity to try and tame the runaway climate change which we have unwittingly unleashed. Come and join us at our Debrief event where we explain the elements of it and how it works and what is left to do.

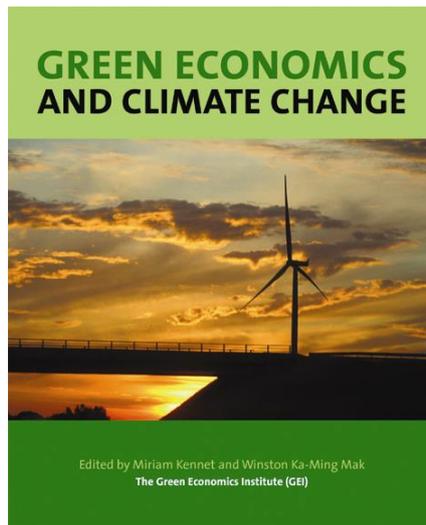

Come and have your say and influence world events in a way which will not just impact you and your family but also future generations and your descendants as well as all the plants, animals and other species as well as the climate and the planet's systems.

This government has been called penny wise and pound foolish, storing up trouble for our generation as well as future generations. We cant afford the price of silence. Come and campaign with us to implement for rapid and deep change.

**Climate Change is upon us, it is already affecting all of us, in many parts of Africa they are telling us they are experiencing 8 months of the year all day and all night 45 degrees of heat and its not even malaria they are worried about now - its heart attacks- no one can stand such heat. Neither can we.**

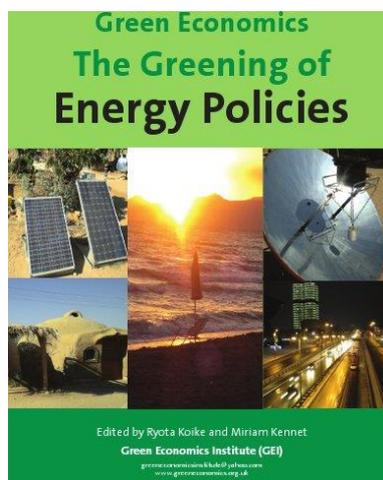

**We at the Green Economics Institute, played a really active part in the COP Process hosting some of the top scientific events and having Side Events, Official Delegations, Conferences, Exhibitions and Books. We Alerted Policy Makers that the public has had enough and wants change. Sensible change, future proofed change. Change to make a difference. Change to provide each and everyone of us with a benefit. A better climate.**

**( Registration: Please email us at [greeneconomicsinstitute@yahoo.com](mailto:greenecomicsinstitute@yahoo.com). If you are paid up member of The Green Economics Institute for 2015 or 2016 then its free. Just send an email. If you are not yet a member, please send an email request to attend and your contact details, a biography or cv.**

## Our Books:

If you cant come to the conference, you can still help the campaign. Buy our books. Support our Campaign. Learn how to make a difference. Make Change with our network of like minded people all around the world. Today.

 Side Event at COP21 Paris Kyoto UNFCC Climate Conference  
 UN Climate Change Conference December 2015 (COP 21/CMP 11)**

## **Our Official Side Events in Paris at COP 21 December 2015**

*Visioning 2 Tonnes of Carbon Lifestyles, Government and Business Scenarios*

**How would a 2 tonnes of carbon life style be for the average person in a selection of countries using todays' technologies and tomorrows technologies? What changes would need to be made to the economy as a whole and for individuals and companies in particular?**

**What are the range of choices for this change to be able to be implemented?**

**How does this fit within the Kyoto UNFCC framework, and where could it be introduced or implemented in the process? When could it be implemented in the process? What are the challenges for government? Which countries progress maps would allow for this possibility in their current plans- which countries would find this more challenging for their economies and which might find it easier or are already on a compatible pathway?**

**Climate Change – The Economics of Comparative Mechanisms for slowing down or even reversing runaway climate change and engaging the Public with clearer mechanisms for climate stabilisation.**

A proposal for working towards an eventual and possibly necessary 2 tonnes of carbon ration in future, for everyone on the planet in order to clarify the climate behavioural changes. How practical will this be and how necessary will this be and at what stage would this have to be implemented if things dont improve? The relationship of this idea to the aims of the Paris COP 21 Conference which are stated in the Ministers' Agreement and include: 'in a balanced manner, mitigation, adaptation, finance, capacity building, technology development and transfer, transparency of action and support; not solely focus on mitigation; provide a framework for Parties to enhance actions to limit warming to below 2 degree Celsius and enable adaptation; and include comprehensive contributions that will be nationally determined and reflect each Party's highest possible effort, in accordance with its common but differentiated responsibilities and respective capabilities (CBDR)'.

1. Miriam Kennet MA MSc Oxon member of Mansfield College, University of Oxford and also the Environmental Change Institute Oxford, Founder of The Green Economics Institute and also Editor and Founder of The International Journal of Green Economics and The Green Economics Institute Publishing House

2 Peter Kirby Harris Green Economist Climate and Energy Programme Convenor for Bright Blue Think Tank, London and author of a forthcoming book - 'Joining the dots - connecting Climate, Energy and Environment for a world in transition'.

3. Professor Peter Yang,(China and USA) Author USA and China Green Energy Policies a comparison and A Green Economics Perspective of Renewables and many other papers, articles and books.Peter Yang has a Ph.D. in German from the University of Utah and a Ph.D. in East Asia Studies from the Ruhr University Bochum. He was a research professor specializing in international economics in China, who published on its economic reform policies and strategies in the early reform years. He proposed, among other measures, the reform of the Value Added Tax (VAT) as a major step in

China's economic reforms. His current teaching and research as Associate Professor at the Case Western Reserve University, USA, focus on German and Chinese Studies on Environmental and Climate Protection Policies, Sustainable Development and Transformation, Renewable Energy Promotion, and Renewable Energy Technologies.

5. Michelle S Gale de Oliveira (Brazil) Founder Gender Progress and author and editor of 100 books on Green Economics and regular COP delegate

**Our UNFCC Side Events are always packed and completely full Details of some our activities at this COP are shown below.**

## **Side Event No 2**

### **December 2015 Paris COP 21**

**Ministers and Co Hosted with the Environmental Change Institute, University of Oxford University of Oxford, Environmental Change Institute (ECI) "Metrics of progress towards net zero and the two degree goal: science for a safe c How would a 2 tonnes of carbon life style look? Climate" and '2TonnesCarbonLifestyle'**

**Speakers will include:**

**The Hon. Tim Groser (Minister of Trade, & Minister for Climate Change, New Zealand, Confirmed), Jan Fuglestvedt (CICERO, Norway), Xolisa Ngwadla & Francois Engelbrecht (CSIR, South Africa), David Frame (Victoria U. Wellington, New Zealand), Myles Allen (U. Oxford, UK), Adrian Macey (VUW, Chair) and University of Oxford, Environmental Change Institute (ECI), Joan Arthur. Green Economics Institute (GEI), Miriam Kennet, Victoria University Wellington (VUW), Mr. Dave Frame**
