# Three Days to Change The World

**Reforming Economics, Saving environmental and social justice in an age of tyranny, privatisers, fossil fuellers, xenophobes and divide and rulers but also an age of emancipation. Reclaiming the narrative for social and environmental justice.**

These conferences are designed to create a unique global discourse of social and environmental justice, inclusion, fairness, resilience, survivability, and reforming mainstream economics and creating new discourses which can allow the human species to survive another 10,000 years. Indeed **Ban Ki Moon's team** has told us that our ideas are some of the very few which can actually work and can actually implement the COP UNFCC United Nations Climate Conference Resolutions. Prince Charles has said that our academic journal is music to his ears, We have won the Luxembourg Green Business Award and our Director/Founder was named as one of the 100 most powerful women on the planet.

**Call for Papers**, Journal Papers, Speakers, Participants, Workshops, Ideas for Subject Streams, Keynote Speakers, Book Chapters, Academic Proceedings Papers, Magazine Articles, Policy Reports, Volunteers, Facilitators, Exhibition Stands, Sponsors, Green Economics Institute Members, Speakers from Global Institutions, Scientists, Academia, Business, NGOs and Campaigners, Change Makers, Scientists, Innovators, Philosophers, Economists, Financiers, Thinkers, Environmentalists, Social and Environmental Justice Makers, Development workers, Policy Makers, Politicos, Writers, Students, Lecturers and many more!

## Green Economics Institute Publishing House

We publish 50 books, 30 academic proceedings, hundreds of papers, reports and book chapters. We also have an academic journal ***The International Journal of Green Economics***, publishing 4 issues a year. If you would like to present a workshop or idea at our conference and publish in our lovely and unique and accessible books, please email us today to discuss how to get involved with our global network of 30,000 diverse change makers. Join us today and change the world with like minded people!

*People who love other species, people who love humans, people who love systems of the planet !*

Our conferences are for everyone, are very inclusive, and have voices from many countries from around the world from all walks of life and all sorts of backgrounds, all abilities, and all sorts of challenges, mental physical, being minorities, older people, younger people all realising their full potential etc.

*Come and help us save the world and lead change and progress!*

*Positive and optimistic views of the world! It's never too late to do things*

*Never underestimate the power of one person to change everything!*

**Call for Papers: Send your papers and ideas to  
[GEIBooksandjournal@yahoo.co.uk](mailto:GEIBooksandjournal@yahoo.co.uk)**

**Sessions will include:**

All people everywhere, minorities, majorities, indigenous people, able people, less able people, mental and physical challenges, women, all genders etc

Nature, the biosphere, other species, stopping the human caused suffering of other species, biodiversity, individual life patterns of other species, group life patterns and safety, endangered species. Humanity of animals. Ethics of animal keeping, husbandry and domestication. Cruelty and how to avoid it happening. Saving the apes. Avoiding extinction and the mass extinction.

The sea, water, rivers, fish. Marine eco systems, coastal problems.

**Pollution** and air pollution and health

Ageing demographics, the care crisis, migration, population, xenophobia, caring sharing and supporting each other in a frightening and uncertain world.

**Young people**, the lost generation, housing, homelessness, benefits. Public policy, the property mess, affordable housing, public housing

**Climate Change**, Climate Science, reports from our COP 15- 21 delegations and our plans for our team at COP22 in Bonn lead by the government of Fiji. We are calling for team members, sponsors, supporters, helpers. Carbon Rationing debate.

**Migration**, refugees, ethics from the people who have experience first hand of migration, refugee life and genocide, The Jazidhi people, other minorities.

**Indigenous people** and their knowledge and rights and their economy. How green economics is one of their main hopes.

**Our green library projects**

**Renewables**, Now the investment of choice- patterns of renewable development and investment

**Investment**, finance, economics, the economy, Global Institutions, Banks, Finance Houses, Public economic policy, climate finance

**Science and Technology and Future Innovations** – the latest green thinking

**Food security** in a world of climate unpredictability and instability. Access to food, organic farming, free range, increasing disease due to climate change. The reduction predicted in food and food security in an age of increasing populations

**Launching New books** on Art, Farming and food in India and in Japan, Organics, The Caribbean, Japan, Economics Values, Climate Finance and many many more.

Launching our new fiction books

**Migration and trade**, protectionism, v making locally to sell locally, relaunching home manufacture and industry and engineering and technology.

**Changing narratives about migration** – reclaiming the stories, positive migration stories from around the world where migrants have saved the day and laid down the basis of whole economies and industries. ( Building on last year's very successful conference on The Migration Journey, A project supported and funded by The Green European Foundation and other green foundations and supported by the European Commission.) We hear from the Refugee Resource Group in Oxford about the excellent work they are doing and what is being done around the world.

**10,000 years of farming and domestication**– an audit- how have we done? what could we improve? will it last another 10,000 years, what do we do next? what is the meaning of domestication, of women, animals, crops, cereals, nature? Is it right- ?

whose domestication is it ?
<b>The Greening of the Caribbean</b> – how do we change its economy for resilience- a project we are doing in partnership with the UK Foreign Office in the post Brexit world as part of the Caribbean Leaders 2030 initiative. We report on the latest findings.
<b>Finance and the Economy in Brazil</b>
<b>The Greening of Italy</b> and innovations in its economy and policies
<b>The Economy of Japan and Nuclear Challenges</b>
<b>Air pollution</b> , diesel, technofixes or changing lifestyles, if we cant trust the car companies to do the right thing – is it time to impose rationing to save the climate and civilisation? whose civilisation is it? Transport and travel
<b>Green IT</b> – a real alternative- democracy and access?Big Data issues,confidentiality
<b>Indigenous voices</b> from around the world wanting to use Green Economics- what they need and how we can help them
<b>Black Lives Matter</b> : Black Womens Writing
<b>Human rights</b> in an age of fear and violence
Are we living in an <b>Age of Democracy or an Age of Tyranny?</b> Are they related?
<b>The Age of the Earth: Mass Extinction cycles, The Anthropocene</b>
<b>Education and the Media</b> ; Truth Post Truth, whose truth, science, education of the masses, the opiate of the masses, fake truth, fake science, misleading the public, lies, damned lies and deliberate lies, hacking, freedom of information or misleading the public, the lack of critical analysis at university, the lack of criticism by students, public acceptance and lack of resistance and lack of ethical vigour, the appalling state of political ethics.
<b>State sponsored terrorism</b> , torture, violence, murder- how do we cope with the fact that most genocides are done under ‘ legally elected or appointed regimes?’ what does that tell us? what do we do?
<i>How do we do as we would be done by? how do we treat our neighbour as we would want to be treated ourselves?</i>
The threats from the extremist groups and regimes around the world in office or about to take office?
<b>Taxonomies of Economics and Finance</b> – what does it really mean?
Taxation, investment issues, inflation, trading blocks, green investment, green funds, climate funds, environmental economics, heterodox economics behavioural economics, green economics, ecological economics.
<b>Saving the forest and the rain forest.</b> Debt for Nature swaps, accounting for the environment, costing the environmental, values and valuing the world and the environment.
Rapidly developing countries and their pathways, the implications.
International trade, and climate miles, embodied energy and life styles, is it time to change and think about how to move to a better life?
<i>Reforming economics – mainstream reforms today</i>
Mainstream economics prevailing ideas, bubbles, property, the national regional local and global economies. Trading blocks. Alternative economics teaching, theories, ideas.
<b>Land Grab, Robotics, Privatisation and Work</b>
<b>The new science of the individual in an age of robotics and concentration of power. New Feudalism and the oligopolies of global influence, how do the rest of us cope? Gardening, growing our own food, resilience, self sufficiency.</b>

**Health, mental health**, psychological changes to ensure survivability and sustainability- explaining why people are distrustful and wont make the changes yet. How do people really think and plan for the issues?

**Mental Health and making the shift- why is it so difficult to alter what we do and how we do it?**

***Building on last years excellent work by our team of psychiatrists, we explore cultural shift and the way our minds stop us doing what is sensible and keep directing us off the cliff of survivability even though we all know it's stupid.***
