In this environment of economic disaster, corruption and mismanagement, combined with global and Europe wide food policies, we need to reclaim a sense of sanity in our supply chains. Biodiversity is lost, cruelty is endemic in the food chain and safety and health issues are completely lost in the current agribusiness disaster. Let's reclaim the economy of food with a much more humane, local centred, safe and healthy production which is better for
people, nature, other species and the planet and much more cost effective and useful. Its time to take back control from the globalised mess to a more productive extensive, benevolent and up to date caring and sharing food production and distribution -kinder to people, nature, biodiversity, other species and not least our pockets- make no mistake we are paying hugely for the current mess in all kinds of ways ! Lets get change moving ! Lets get checks and balances back in ! Lets eat right to get fitter for our own well being!

Land use is a real problem for climate change and biodiversity.

Many people have still nowhere to live, many people in the Uk today are relying on food banks in the Prime Ministers own area. Is this the economy of the 21st century we can be proud of -no – its a shameful disaster and is replicated in many countries! Its time to sort this mess out all over the world! What we grow reflects who we are ! Lets not grow more concrete- lets grow living biodiversity, lets grow innovation! Lets grow sharing and caring in our economy! Sharing the commons between us, the rest of humanity and also nature and other species. Lets start living within the bounds of nature.

This conference explores the very latest thinking in global change and social and environmental justice and science and also provides professional accreditation and training for people coming together to think right outside the box and to create policy change together for the global economy and local communities.

With special bonus Oxford Union celebrity debate

“Global Economy for the 21st century, sharing, caring or global disaster!”

“This house believes the west is sleep walking its way to economic disaster and the east is sleep walking its way to social and ecological disaster”

Speakers already confirmed:

Dr Jawaria Fatima Ali,
Comsats University of Information Technology, Lahore, Pakistan, Greening Human Capital Initiatives for sustainable economies, A review of development, challenges and opportunities

Viacheslav Potapenko, PhD, Ukraine

Green Growth in Ukraine: Plans, Facts, Strategic Perspective

Professor Graciela Chichilnisky
Columbia University and USA Author, A list speaker PHD in Economics and also in Statistics lead author of Nobel prize winning IPCC report. Inventor of the carbon market in the Kyoto Protocol and the academic discipline of sustainable development
Tracy, Marchioness of Worcester
Campaigner for the Greening of Food, farming and agriculture and cruelty free farming and against agribusiness.

Professor Dr Dzintra Ajstaja
Latvia expert Economist on sustainable development economics and green economics

Dr. Michael Briguglio, Malta
Michael Briguglio The Department of Sociology of the University of Malta. Sociology of EU Accession and Civil Society Empowerment: the case of Environmental NGOs in Malta. He is chairperson for the Greens.

ENGOs, EU Accession and Empowerment – Case Studies from Malta
ENGOs and Malta's EU Climate Change negotiations.

Miriam Kennet, CEO, UK
Miriam is Co-Founder and Director of the Green Economics Institute and the founder and editor of the International Journal of Green Economics. She is Editor of the Green Economics series of books. She is a member of the Environmental Change Institute, Oxford University and of Mansfield College. Currently nominated for the One World Action NGO prize for most powerful global unseen woman, this months Alumni of the Month at London University South Bank and Honorary President of the Green Institute, Hong Kong. She has edited 9 books on Green Economics this year.

Natalie Bennet
Leader of the Greens and long time member of the Green Economics Institute

Charles Secrett
He led Friends of the Earth as Executive Director (1993-2003), transforming it into the first sustainability pressure group, with an emphasis on integrating green economics and social justice with environmental protection in its research, campaigns and community action, with it becoming the UK's most effective campaign NGO for many years in energy, food, pollution, wildlife, waste and overseas trade issues.

Charles Secrett is the founder and coordinator of a new citizens action movement, The ACT! Alliance, set up to help transform markets and government so that they focus on human and planetary well-being. He is a co-founder of The Robertsbridge Group, a founder member of the Green New Deal Group, and an advisor on Shell's Global External Review Committee as well as for Base Communications and Base Cities.He has been Chair of Triodos Renewables (2003-12); a Senior Associate at the University of Cambridge Programme for Sustainability Leadership (2006-12); and, a Special Advisor on Climate and Sustainability to The Mayor of London and a Board Member of the London Development Agency (2004-8). He was a member of the UK Round Table, then Commission, for Sustainable Development for 10 years. Initially employed as a wildlife and countryside campaigner in 1980, he initiated campaigns with local communities to take peaceful direct action to protect threatened wildlife sites; and drew up a draft law to protect Britain's most important wildlife reserves that 15 years later formed the basis for a successful FOE coordinated campaign to replace the Wildlife and Countryside Act. In 1985, he planned and launched the first international Save the Rainforests campaign, focussing on consumer and tax-payer actions against destructive company, aid and debt programmes, and for the protection and sustainable use of rainforest resources and services. He worked with others in the North and South to develop this campaign into the global rainforest movement by the late 1980s. He has worked on environmental investigation and research projects in Brazil, Costa Rica, Malaysia, Nicaragua and Nigeria. He attended the University of North Carolina at Chapel Hill between 1972-1977 on a Morehead Scholarship.

Roger Martin
Director of Population Matters

"Roger Martin was a career diplomat for 22 years, serving ten years in Africa, Asia and the Middle East and four at the UN before resigning 'in fury' as a Deputy High Commissioner. He became an environmentalist in the South-West, and has served on, and chaired, numerous official and NGO bodies including Environment
Agency, MAFF/DEFRA, National Park, Regional Assembly, Biodiversity Action Plan, Waste group, Local Agenda 21, Wildlife Trust Director, Regional Chair CPRE, etc. He observed in all these that population growth clearly multiplied all their problems, yet was never discussed. Now as Chair of Population Matters, he strives to break this 'mad taboo', and has spoken on the population/sustainability/resources link at 15 international and many national environmental, economic and other conferences. 

BIANCA MADISON- VULETA
Bianca is highly trained and experienced in the areas of holistic, ecological and sustainable living. For the last fifteen years, Bianca has been actively involved in the work of numerous national and international human rights and environmental NGOs as a committed and inspired campaigner, fundraiser and public speaker. She is the Co- founder of The Sustainable Planet Foundation. A passionate humanitarian and environmentalist, Bianca works tirelessly to be the change in the world.

Norferyanti Kammarudin
Editor of our book The Greening of Asia and China and specialist in The Greening of Malaysia

Dr Dessy from Indonesia and the Netherlands
specialist in the Greening of Indonesia and Guest editor of our current issue of our academic journal International Journal of Green Economics

Christopher Flemming

Henry Cox
Long time campaigner and gardener

Dr Tonia Wareka USA
Specialist in economics and labour laws and womens equal opportunity research

Ryota Koike (Japan and UK)
Author of our energy – and green energy policies book

Bradley Panico
Environmental scientist and specialist in waste, and in food science

Michelle Gale De Oliveira Brazil and USA
Human rights and land use rights in Brazil

Professor Maria Madi, Campinas University, Brazil
Financial issues in food and poverty in Brazil

Dr Chidi Magnus Onahua
Nigerian Green Economist talks about the Greening the Sahara Project and launches his new book in our book series, about the greening of Africa.

Salvador Perez Moreno (University of Malaga, Spain)
Economics Fluctuations and child mortality in the least Developed Countries

Katherine Kennet
Nepalese Health issues and what its like to live on a dollar a day. How people in some of the very poorest countries survive and how it affects their health. What the global economy can do to prevent such poverty.

Billie Jordan Daus
Young persons perspective of the global economy

Marlynn Lee
Radiographer and specialist in curriculum innovation and Green Economics Education
Newbury College

Kerry Jordan Daus
Canterbury Kent University Director of Primary Education Course
Education and Innovation for the 20th and 21st centuries

Dr Elizelle Juaneé Cilliers and colleagues North West University, South Africa

With a Masters Degree in Urban and Regional Planning, Cum Laude from North West University and a PhD degree in Urban and Regional Planning in 2008 and a Masters Degree in Economics in 2010, she is a professional registered Town Planner at the South African Planning Institute and has her own planning firm since 2009. She was appointed as Senior Lecturer at the North West University in 2009, and international researcher for Wageningen University in the Netherlands, conducting research on various Interreg EU projects. She has published various articles in international accredited journals and also two books. The interface between urban planning and economics (especially green economics) is her speciality field.

Don O'Neil, UK

Don has a BSc(Hons) in Mathematics and an MA in Environmentalism and Society.
He has been the Oxfordshire Greens Treasurer from September 2000 to date and is a political columnist for The News, a St. Vincent and the Grenadines national newspaper

Using dual global currencies to limit carbon emissions

Clive Lord

The Citizens Income and the Green Economy moving into the mainstream

Steven Mandel, UK

After spending more than 20 years as a development economist working both as a civil servant in Africa and a consultant in Africa, South Asia, Pacific and FSU/Eastern Europe, specialising first in transport and then in national and sectoral planning, aid management and budget reform, Steve joined the New Economics Foundation where he worked on Third World Debt, international financial institutions and reform of the international financial architecture, publishing a series of three papers on the debt issue. He is now a freelance consultant working on these and issues in macro-economics and a research associate of the Department of International Development at Birmingham City University.

Provisional invited Keynote Speakers include:

Dr Jane Skinner South Africa Specialist in philosophy of economics

Dr Sarah Skinner Solar Energy Specialist

Oliver Rothschild

Sir Crispin Tickell

Douglas Watson
Juliane Goeke (Germany)  
Editor International Journal of Green Economics

David Taylor  
Earth Spirit The UKs leading Green Education Centre

Darren Johnson GLAM  
Talks about his work in London for a Green Economy

Dr Susan Canney, University of Oxford Zoology  
Expert in Biodiversity in Mali and co author of a recent book on biodiversity.

Caroline Hearst  
Specialist advisor in Autism spectrum will be running a workshop on better understanding of the spectrum

Dr John Bordman Master Class  
Oxford University Environmental Change Institute founder and specialist in soil science and its importance.

Professor Jack Reardon Economist USA  
Editor Pluralist Education Journal and author of several books

Clare Lunn  
USA, Environmental Health Expert, Harvard MIT Oxford etc  
Zuni Indigenous people and their garden farmers and food producers.

Norferyanti Kamarudin GE and her team  
Specialist in agriculture in Malaysia and a qualified green economist

Ceri Galloway  
Green Campaigner on food

Henry Cox  
Long time food campaigner and home gardener and green economist

Tamara Schiopu MBA  
Sustainable Rural Development Consultant  
National Lottery Local Food Fund RSWT  
Plunkett Foundation  
"Integrating food and fuel production for a sustainable future in Moldova".

Iain Tolhurst  
Owner of Tolhurst Organic Farm. Co-author of Growing Green: Organic Techniques for a
sustainable future with Jenny Hall. and other articles and papers about sustainable food and energy in Moldovia.

**Dr Jeff Turk PhD**

Scientific Research Centre of the Slovenian Academy of Sciences and Arts in Slovenia. Academic interests include in Economic and social committee Ecosoc. Social security, social protection, Slovenia, social exclusion, Belgium and sustainability

Jeffrey David Turk earned a PhD in particle physics from Yale (1994). After working as a postdoctoral researcher with the University of Wisconsin group at the European Laboratory for Particle Physics (CERN), he earned an MA in Transition Economics from the Central European University in Budapest, Hungary (1997) and then a DPhil in Contemporary European Studies (2003) from the University of Sussex, where he helped coordinate a research collaboration studying the buyer-supplier relations of companies in Slovenia and Hungary. He is now a Research Fellow and coordinator for international cooperation at the Research Centre of the Slovenian Academy of Sciences. He initiated and is one of the lead partners in the research project Habitus of the Slovene Entrepreneur between 1960 and 1990. His research interests are post-communist transitions, biographical methods and methodological issues in the social and physical sciences.

Dr Turk organised the workshop “Realist biography and European policy” at the University of Leuwen and now has co authored a book.

**Dr Sandra Gusta Latvia**

Assist. Prof. at the Department of Architecture and Building at Latvia University of Agriculture, Doctor of Management Sciences in Economics.

One of founders and member of the Board of the LEA (Latvian Association of Economics), Member of the Latvian Association of Civil Engineers, Education and Science section.

Specializes in: macroeconomics and sustainable development, environmental management, sustainable buildings and building management, sustainable building materials, sustainable building waste management.

**Other speakers invited:**

Marina Magnoni, Italy

Italian economist and specialist in wine and food issues

Mahalet Mekonen

Economist in Ethiopia and author of papers on agriculture and its role in modernising Africa

Miriam Kennet

Kennet has taught at many universities around the world, spoken at several international conferences and published a multitude of academic papers. She has made speeches and workshops on Green Economics in several European countries, including Switzerland, Belgium, Germany, Poland, France, United Kingdom and Spain, and has taught, trained and lectured most recently at Oxford University, Bath University, Cambridge University, Birkbeck College, London University, Slubice University Poland, Frankfurt am Oder and European University Germany, Alicante, Spain among others.

She has attended a multitude of important events and conferences as a guest speaker. Kennet gave a speech at the UK Parliament on Green IT and "Reduce, Reuse, Recycle, Repair". She teaches Sustainable Development to UK Government Departments as part of the National Government School. Kennet also attended the COP 15 Copenhagen Kyoto Conference on Climate Change as
part of an international delegation involved in developing a green economic analysis of climate change policies.

Kennet has been published in the Harvard School Economics Review, the "International Journal of Green Economics" She is editor of Gower Management Publishers academic publishers series on green economics and sustainable growth and a series with Ashgate Academic Publishers on 20th and 21st century philosophy. Kennet has also been a guest speaker on BBC Radio and has been featured of programmes including Wake up to Money programme. In 2011, the BBC broadcast a radio programme on Kennet's life and work

She was named by One World Action Charity, as one of 100 most powerful women in the world creating change.

**Recent Books include:**

**Kristina Jociute**

*Macro Economist*

*Lithuania*

and many other exciting speakers from all around the world
Participants at this conference will be invited to participate in the campaign for planning for the Greening of Food, Farming and Agriculture and sustainability development and green economics perspectives.
