

**Green Economics Institute
INVITATION TO WRITE**

*Reforming economics for all people
everywhere, nature, other species, the planet,
and its systems*

Green Economics
International Journal of Green Economics

International Journal of Green Economics (IJGE)

ISSN (Online): 1744-9936 -ISSN (Print): 1744-9928

Issues 1-4 Volume 10 2016 and Issues 1-4 Volume 11 2017

Our Academic Journal

Invitation to write a paper

We are looking for **32 Papers for the *International Journal of Green Economics* Double Blind Peer Reviewed Academic Journal for 2016 and 2017.**

We are always pleased to receive articles for our academic double blind peer reviewed journal ***The International Journal of Green Economics*** which comes out 4 times a year with rolling deadlines, so you can always submit your papers, abstracts and ideas. It is academic, with Harvard style referencing, no footnotes, and is *double blind peer reviewed*. Many of our writers have enhanced their careers by publishing in our journal, for example obtaining promotion to Professor or becoming a Director of a major NGO or business and many other improvements to their careers or getting jobs they had always dreamed of.

There is a queue to get into this popular journal – the first and only one of its kind in the world. It is ground breaking and launched Green Economics globally. It was founded by Miriam Kennet in 2003.

For 2016 we will accept 32 papers for Volume 10 Issues 1-4.

For 2017 we will accept 32 papers for Volume 11 Issues 1-4.

We will accept 32 papers in 2016 under the wide and broadest umbrella of Green Economics. There will be 2 special issues 2016. These will be

- a) **IJGE Issue 3 2016** COP21 Paris Debrief and Preparing for the Markesh COP22 UNFCC Climate Conference in Morocco, Guest Editor Professor Peter Yang, (USA and China),
- b) **IJGE Issue 4 2016** General papers and papers on the crisis in democracy and the developing crisis of inequality and of climate change
- c) **We will also accept 20 more general papers in 2016 and 32 more general papers for 2017**, which may include any subject on the economy or ***The Green Economy or Social and Environmental Justice and Economics Reform***. Some recent suggestions have included for example: Rebalancing the Economy, Water issues, papers of a General Nature as well as Methodology for Green Economics and the Green Economy, and Ending the War Against Women and minorities and papers on Renewables, Fracking and Climate Change, Black Swan Events Energy, Climate Change, and any aspect of social and environmental and economic justice, innovation and reform.

Authors are also encouraged to write for the Green Economics Institute's Books as well and many of our authors have published in both.

We welcome diverse contributions and we especially like to welcome and help with contributions from new writers and innovative ideas and also from Professors and Nobel Prize Winners and anything in between. The writing and papers for the journal have to be between **2500 and 7000 words**. We cover academic, polemic, simple and more complex writing, political, academic, campaigning and business styles of writing.

The journal is gender **balanced** and balanced between developing countries and developed country authors and also north south east and western Europe, Africa, Asia, and other areas. BRICS, and MINTs etc. It is also multi and inter disciplinary and also pluralist and heterodox. So please send in your articles as soon as possible. They can take several months to double blind review depending on the subject as many of them get reviewed by several subject specialists to achieve this ground breaking mix. Sometimes however papers can go through within a month.

Please ensure you cite any items you have not written yourself and photos must all be attributed to who took them. References must be Harvard style- and we do not accept footnotes and papers must be sent in .odt, or .doc formats, (not pdfs). Please ask for further information or guidance if you need it. Please ensure you do not infringe anyone else's copyright.

Academic citations for your Professional objectives

All our writers and authors do get an academic citation when they publish with us in our academic journal and our academic book series, including appearing google scholar and many of the search engines used by Universities and the academic journal ***The International Journal of Green Economics*** is read in every continent and in some of the most prestigious libraries on the planet, so it will get your ideas out around the world! Many academics and people working in academia need to publish in peer reviewed journals as a condition of their jobs or for promotion and this journal, ***The***

International Journal of Green Economics meets those requirements for you.

We are very keen to encourage new writers and new ideas as well as more experienced writers and academics and policy makers and business people and campaigners. All the issues are gender balanced and diverse and are written by people from all corners of the earth.

We look forward to hearing from you very soon and to your writing for this exciting journal. We have received compliments from Princes, Members of Parliament and all sorts of organisations such as the International Labour Organisation, well known Princes, the United Nations and the OECD. Please email us in the first instance, and we will be pleased to discuss your idea and we will be very keen to encourage you and help you during the writing.

All we look for are the ideas, and we can develop any good ideas with you into a piece of suitable writing and we specialise in developing new writers and publishing new and other voices which are not usually heard!

Email us today with your idea for an article -and submissions: greenecomicsinstitute@yahoo.com

Miriam Kennet is the Editor of *The International Journal of Green Economics*- and she works with a board of 100 people on the journal. The journal is published for us by academic publishers Inderscience but we are responsible for all the content.

Progressive Economics: Reclaiming economics for all people everywhere, other species ,nature, the planet, and its systems

About the Academic Journal International Journal of Green Economics

IJGE addresses all aspects of Green Economics, aiming to encourage economic change and positioning Green Economics at the centre of the Economics disciplines. Green Economic theories, policies, tools, instruments and metrics are developed to facilitate a change to the current economic models for the benefit of the widest number of people and the planet as a whole. *IJGE* focuses particularly on resource management, meeting peoples' needs and the impact and effects of international

trends and how to increase social justice.

Objectives

The objectives of *IJGE* are to establish an effective channel of communication between policy makers, government agencies, academic and research institutions concerned with the running, involvement and impact of the economy on all sections of society. It aims to bridge the gap between academic economic theory and the literature and suggestions for the implementation of modern concepts in the political economy and the general economic debate, structures of political power and public discussion.

The development of an alternative view in contrast to the traditional normatively biased view of economics is the prime objective. The study of Green Economics naturally has to be very multi and interdisciplinary in nature, as the problems it addresses are partly social in aspect and causes, partly scientific in technical development, partly environmental as this is a fundamental limit to all human activity and partly economic and historical in how the current situations have evolved. Green Economics is also particularly influenced by developments in ethical thinking and values and in anthropology in its explanations of past and future trends.

The advisory board consists of a host of academics and practitioners, government members, policy makers and campaigners from round the world in order to meet the demands and the wide scope of the subject.

Readership

IJGE provides a vehicle to help professionals, academics, researchers, policy makers and campaigners working in the fields of international business, economics and local, regional and national government to educate, influence, lobby and share information and to learn from each others' work and best practice in the field as well as to provide a forum to explore new solutions to economic problems.
