Apply now! MSc Course starts on September, 2012

Calling all top economists, scientists, social and environmental policy change makers, innovators and specialists!

We have carefully assembled this exciting Masters course, suitable for graduates from all disciplines!

The Head of the RIO +20 Sustainable Development and Green Economy Conference, Sha Zukang receiving our Handbook of Green Economics from Miriam Kennet CEO of The Green Economics Institute

The Institute's CEO Miriam Kennet at the Conference in the European Central Bank

This challenging course provides you with the analytical, written, presentation and publishing skills and experience to lead others towards your vision of a socially and environmentally more survivable and just, positive and exciting future. It gives you the tools and know how to understand, challenge, manage and change the power structures, policy making, institutions, and taking part as you learn about the way the world really works.

The Green Economics pathway of the Environmental Sustainability suite of courses is the result of a unique collaboration between Birmingham City University and the Green Economics Institute, using the Institute's world-leading expertise to bring cutting edge knowledge to the students. The philosophy of the course places the development of the green economy within an earth-wide, holistic context in the longer term and as a blueprint for 21st century economics practice in the shorter term.

It explores the inter-relationships within and between economic, social and environmental systems, proposing that it is essential to have realistic, holistic and sustainable solutions to the way that our environment is shaped, used and managed. At the heart of these decisions will be the environmental managers, planners, consultants, designers, technologists and policy makers of the future.

Your benefits attending this Msc course include
