Launch of full range of books on Green Economics - for participants to use and to find out about Green Economics and what it really means. As read by Mr. Sha Zufeng!

Inclusion, holistic, sustainable, for everyone and everything on the planet. Everyone counts! Everyone is included! Participatory workshop!

Detailed programme
This workshop with its high profile and robust line up of experienced green economists will be able to support and influence the outcome of the UNCSD in a way that few others will have been
focused over the long term on this subject. It therefore will offer unique 10 year insight into the field and its practise and literature on green economics and the green economy and how and why it has evolved as it has. The field of green economics is about reclaiming, reforming and the renaissance of Economics for all people, especially women, nature, other species, the planet and its systems and about environmental and social justice together. It is about making the economy flourish and that growth is growth in nature not destruction as currently measured. Its the economics of doing and is intensely practical and is a mesh of earth and social science and its methodology and scope are completely unique - high tech positive progressive and forward looking with a completely new analysis of what can be done and how to do it. It is attracting attention all over the world with its fresh and global outlook and this workshop will introduce its main leaders and thinkers and their ideas and writing and projects and campaigns.

Creating Green Economics Together! Join the Team and work towards the development of Green Economics in the 21st and 22nd Centuries, for a sustainable, inclusive, accessible, resilient economy of Sharing, caring and doing- a hi tech economy of the future!

Come and take part and find out what it really means and how to use it and where the resources are for you to use!
