Africa needs technological support, capital and also new ways of thinking, Green Economics is being used as an effective solution right across the continent from countries as diverse as Egypt, Ethiopia, Nigeria and South Africa. This book charts the story of the emerging success of these ideas of change in ecology, society, economics and policy making. The reader is provided with the latest news about Africa's new innovations, its green projects and its agricultural progress and challenges as well as its unique innovations. For example Ethiopia's Commodity Exchange (ECX) is one of the ground breaking changes in the field of agriculture, transforming the growth and development of that country. ECX aims

to facilitate all individuals that are involved in the marketplace – the farmer, trader, the market as a whole and the consumer.

Today, news about Africa has been predominantly composed of hunger, poverty, child mortality or famine. So how do we move from this situation towards the development of a new Africa? The editors of the book suggest that one of the main reasons why many African economies are struggling is partly due to the lack of technology, an inadequate supply of capital and other factors such as cultivable land and labour. We need a new light, a mechanism whereby Africa's great power can be better used, and this book introduces Green Economics as the new 'Beacon of Hope,' in the words of African voices themselves.

Green Economics is a tool for countries in Africa to implement its mechanisms and systems in order to increase their economic, social and environmental power, sustainability and survivability.

Africa needs the very latest ideas and innovations to meet the diverse challenges of the future and to avoid the exploitation by others of its wonderful resources – including people, land, minerals, wildlife, biodiversity, history and cultures, and use them for its own benefit and that of its peoples. Implementing Green Economics takes a real step towards this goal.

### Biographies of Editors:

**Miriam Kennet** is CEO, director and co-founder of the Green Economics Institute and the founder and editor of the International Journal of Green Economics. She is a member of Mansfield College, Oxford University and the Environmental Change Institute, Oxford University. Her research at South Bank University, London and at Templeton College, Oxford University focused on green issues and strategic management of international firms. She is co-editor of one of the few books on Green Economics; "Green Economics, beyond Supply and Demand to Meeting People's Needs", and author of over 100 articles on green economics and stakeholder theory, corporate social responsibility and economics transformation, green jobs, geo engineering and women's unequal pay and poverty, climate change, poverty prevention and biodiversity economics. Miriam recently was named as one of the 100 most powerful unseen women making change globally at a ceremony in London. She is the founder and Director of The Green Economics Institute and the International Journal of Green Economics.

**Mahelet Alemayehu Mekonnen** is an Ethiopian economist interested in economics and political science at Richmond The American University in London. She heads up our Africa team and is editor of our special issue of our academic journal on Africa and our forthcoming book about Africa. She is economics advisor for the management team. She is a firm believer in education and believes in tackling one of the most important problems we are facing in the global world, particularly the issue of climate change and inequality towards women. Her work relates to examining large projects and questions of sustainability - and development.

**Dr. Chidi Magnus Onuoha** is a Development Economist, Lecturer, Author and Policy Analyst. He served as a Research Expert during the United Nations Industrial Organization (UNIDO)/ Institute of African Studies, Oxford University, UK, collaborative effort on the survey of Nigeria's manufacturing sector in 2004. He is a Member: of Climate Change Roundtable of Nigeria's Federal Ministry of Environment; of Editorial Board of an International Journal of Green Economics. He is presently the Executive Director, Green Economics Nigeria He has also delivered research papers nationally and internationally, among them are: Sustainable Development and Poverty Reduction in Nigeria (July, 2008) and Economics of Green Wall Sahara Program (Nov2008).
